

Controls for a world in motion

Dear Valued Customer,

As part of Wescon Control's on-going commitment to keep you aware of changes that may affect your delivery schedule due to COVID-19, we are providing this update.

Starting March 24th and continuing through April 14th, one of our three manufacturing plants has been closed by the local government due to COVID-19 outbreak in Bangalore, India.

As for our manufacturing plants in Wichita, KS and Juarez, Mexico and our warehouse in El Paso, TX we are still operational and are working as Essential Critical Infrastructure Workforce under the Critical Manufacturing category. As such, it is our intention to remain operational and continue to supply our customers during the Coronavirus (COVID-19) pandemic.

As a precaution, Wescon Control's strongly recommends current customers plan for unanticipated fulfillment obligations by placing orders for periods longer than usual.

Please contact your Regional Sales Manager or Sales Coordinator with any further questions.

Visit Wescon's website daily for further updates. (www.wesconcontrols.com).
