

Controls for a world in motion

Dear Valued Customer,

As part of Wescon Control's on-going commitment to keep you aware of changes that may affect your delivery schedule due to COVID-19, we are providing this update.

As of now, our North American plants are still operating normally with limited supply chain interruptions. However, this situation remains very fluid and may change at any time. Also, our plant in Bangalore, India has now been opened and is currently running at a reduced capacity.

As a precaution, Wescon Control's recommends current customers plan for unanticipated fulfillment challenges by placing orders for periods longer than usual.

Please contact your Regional Sales Manager or Sales Coordinator with any further questions.

Check Wescon's website regularly for further updates ([www.wesconcontrols.com](http://www.wesconcontrols.com)).
